

Groove & Bore Panel

Madrid's newest acoustical wood design allows you to accent a space with the richness of natural wood. Our groove and bore patterned panel features a variety of groove spacing in a reflective wood surface. Sound absorbing fiberglass is placed as a backing over these openings to create superior acoustical values. Madrid's groove and bore pattern acoustic wood can be used on walls or ceilings, or transition from ceiling to wall. A variety of attachment methods are used to suspend the wood to the surface. This panel is available with a fire-rated MDF core, with more than 200 veneers to select from.

Also available in linear, grille or open cell design.

- Classic open reveal style with concealed clip systems
- Panelized system
- Custom lengths available

Specifications*:

- No added urea formaldehyde resins
- FSC®-certified options available
- California Air Resources Board (CARB) compliant
- 100% Pre-consumer Recycled Wood Fiber Content
Third-party Certification
- Environmentally Preferable Product (EPP) Grademark
Program CPA 2-06
- Scientific Certification Systems (SCS) Third-party
Certification 100 percent pre-consumer recycled fiber
- May contribute to LEED Recycled Content Credits
MR 4.1 and MR 4.2
- Density: 47 pounds per cubic foot
- Modulus of Rupture: 4,500 psi
- Modulus of Elasticity: 550,000 psi
- Internal Bond: 140 psi
- Hardness: 955 pounds
- Screw Holding: Face: 230 pounds - Edge: 185 pounds
- Linear Expansion, Maximum Average: 0.35 percent
- Thickness Swell, 24-Hour Soak: 6 percent
- Finished with water-based zero VOC Matt 20 finish
- Class A rated
- Excellent sound absorption with acoustical infill panel
(GB-2 - NRC 0.80)**

* based upon Madrid's fire-rated MDF core ** Using 2" foam acoustical backer
